

The Peptide Therapeutics Forum 2021

The event provides an innovative platform to exchange on the various aspects of drug development with a focus on peptides, including examples for successful development candidates. The forum disseminates information on latest news in the broad field and enables networking of interested parties from academia and industries.

The event will take place on-site for those who are able to join us in Basel or online for those who are not able to travel due to COVID-19 restrictions.
