

Beyond the accessible – enabling peptide-based innovation

Dr. Christian Schwarz

Numaferm GmbH, Merowingerplatz 1a, 40225 Düsseldorf, Germany
christian.schwarz@numaferm.com

At Numaferm we believe in the untapped potential of peptides and proteins as feedstock for better, safer, and healthier products in life sciences and beyond. Cost of goods, safety profiles and material supply should never be limiting factors. That is why we have pioneered a unique approach to produce such biomolecules at highest quality, affordable, at needed scales and in a sustainable way. Our mission is to support innovation of our partners. At PTS2021 we are going to share selected case studies and demonstrate how we make a difference to our partners' peptide development projects.
